

The 28th International Scientific Conference of Young Scientists and Specialists (AYSS-2024)

28 October to 1 November 2024, JINR, Dubna, Russia

The pilot version of the JINR Publications Repository

I. Filozova, G. Shestakova, A. Kondratyev, A. Bondyakov, T. Zaikina, I. Nekrasova, Ya. Popova

What is JINR Institutional Repository?

Scientific service of the JINR DIGITAL ECOSYSTEM.

Contain scientific publications of JINR authors-employees (articles, preprints and other materials, reflecting and facilitating Institute research activities).

Digital archive – information system for accumulation, long-term storage of information providing reliable access to digital objects, representing the result of intellectual activity (in our case – publications as a result).

Store a lot of Open Access publications. Open Access – a method of scientific communication when the author of the work use the right to bring the results of research to the public attention; free, prompt and stable access to the full text of scientific materials in real time for any user in the global information network without any restrictions.

Source of reliable information, accessible from other software systems.

Makes it easier to work with collecting and further usage of publications. In terms of publications, there is currently a lot of manual work, and with a repository, it can be automated.

The main benefits of JINR Repo

- Easily login via SSO;
- Harvesting of publications from external sources (less work for users);
- Search and browse publications by authors (including archive), organizational units, keywords and more... using different filters and queries;
- Submit your own publications by import or manually;
- Check by the moderator of all users' submissions;
- Store the results of your publications activity in one place.

The screenshot shows the JINR Publication Repository homepage. At the top, there are three submission options: "Import from external sources (by DOI, ArXiv Identifier, Pubmedid, etc.)" with a green arrow icon, "Manual input" with a hand icon, and "List of self-entered publications (from 09.2024)" with a document icon. A message states that all submitted publications are validated and verified by a moderator and will be shown within 2 days, with a link to the "User Submission Guide".

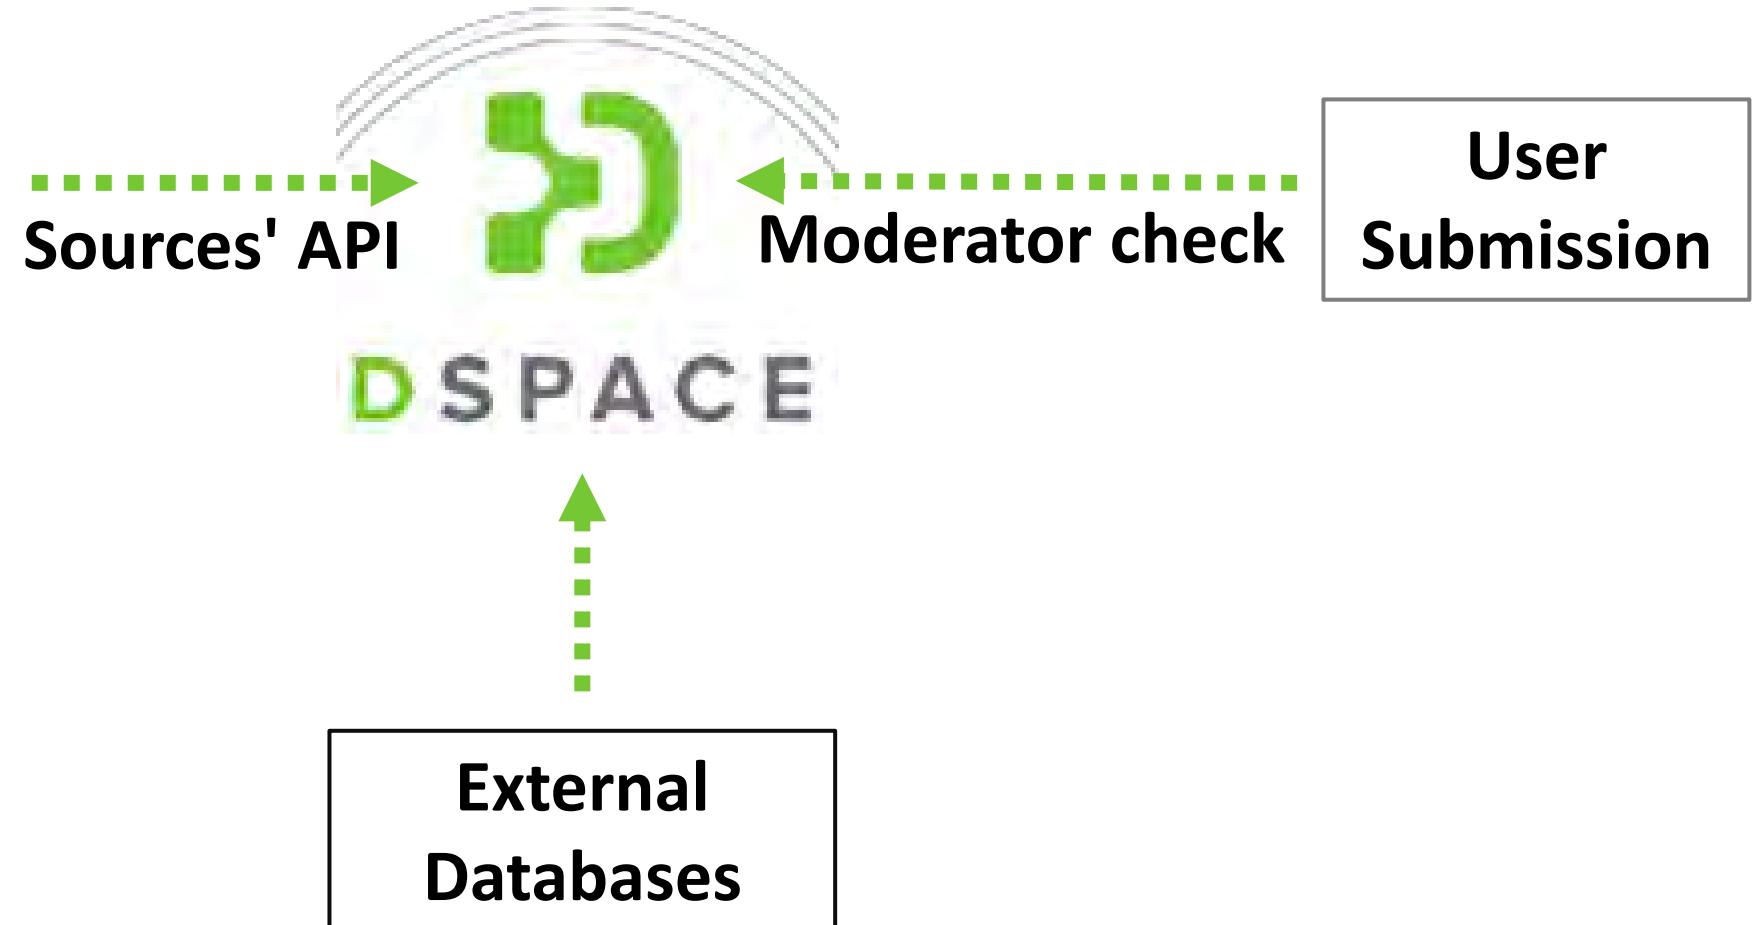

The main area features a search bar with "All of DSpace" and a placeholder "Search the repository ...". Below it, a "Filters" section includes dropdown menus for "Author" (set to Filozova, I.), "Department" (set to F.Dep: Лаборатория Информационных Технологий Им. М.Г.Мещерякова), "Subject", "Date" (set to 2023 - 2024), and "Has files".

The "Search Results" section displays two entries:

- The BM@N spectrometer at the NICA accelerator complex** (2024) Egorov, A.; Egorov, D.; Elsha, V.; Afanasiev, S.; Agakishiev, G.; BM@N (Baryonic Matter at Nuclotron) is the first experiment operating and taking data at the Nuclotron/NICA ion-accelerating complex. The aim of the BM@N experiment is to study interactions of relativistic heavy-ion beams with fixed targets. [Show more](#)
- Production of π^+ and K^+ mesons in argon-nucleus interactions at 3.2 AGeV** (Springer Science and Business Media Deutschland GmbH, 2023) Afanasyev, V. First physics results of the BM@N experiment at the Nuclotron/NICA complex are presented on π^+ and K^+ meson production in interactions of an argon beam with fixed targets of C, Al, Cu, Sn and Pb at 3.2 AGeV. Transverse momentum ... [Show more](#)

User Submissions – Manual Input

The screenshot shows the JINR Publication Repository homepage. At the top, there is a navigation bar with a logo, the word "Publications", a search icon, and a "Log In" button. Below the navigation bar, there are links for "Communities & Collections", "All of DSpace", and "Statistics". The main title "JINR Publication Repository" is displayed prominently. Below the title, there are three submission options: "Import from external sources (by DOI, ArXiv Identifier, PubmedId, etc.)" with a green arrow icon, "Manual input" with a hand icon (which is highlighted with a red box), and "List of self-entered publications (from 09.2024)" with a grid icon. A note below states: "All submitted publications are validated and verified by moderator and will be shown within 2 days. Please, read the User Submission Guide." At the bottom, there is a search bar with the placeholder "Search the repository ...", a "Search" button, and two charts: "Number of Publications by Year" (2024: 832, 2023: 1539, 2022: 1647, 2021: 1949, 2020: 1664, 2019: 19) and "Number of Publications by Type" (Article: 6254, Preprint: 358, Book: 14, Learning Object: 2, Book chapter: 877, Report: 2, Thesis: 98, Patent: 48).

Abstract

В настоящее время научная коммуникация играет важную роль в предоставлении обществу и исследователям научной информации. Одним из компонентов коммуникации является обеспечение доступа к публикациям с научными результатами исследователей. Открытые научные инфраструктуры, такие как открытые репозитории и журналы открытого доступа, помогают донести знания до читателей. В рамках соглашения о сотрудничестве между ОИЯИ и DESY совместно с участниками проекта JOIN² в ОИЯИ был создан институциональный репозиторий JINR Document Server (JDS) для хранения информационных ресурсов Института и обеспечения эффективного доступа к ним. Сервер документов ОИЯИ на платформе JOIN² предоставляет широкий набор функций, которые делают его не стандартным институциональным репозиторием, а полноценным рабочим пространством для ученых и исследователей.
